Dear Brian

As requested, a list of my findings with Diagnodent and the CrystalAir air abrasion unit.

## DIAGNODENT

- 1 Impresses patients.
- 2 Reproducible, reliable measure of deterioration in fissures.
- 3 Gives one the confidence to investigate and restore fissures, which would otherwise be left on watch.
- 4 Early diagnosis removes need for local anaesthetic most of the time.
- 5 It even increases revenue on the NHS!

## CRYSTALAIR

- 1 Patients love it, as it removes the need for anaesthetic.
- 2 Quick, so early pit and fissure caries can be treated at the first visit.
- 3 Because of the ability to work without local anaesthetic, multiple sectors can be treated in one visit.
- 4 I even had a filling myself, painlessly, following a higher than average Diagnodent reading.

As you can imagine I am more than pleased with the investment I made with your company. Thank you very much for making life easier for my patients and me.

Yours sincerely

S C Pace BDS
